Current appointment

Consultant in Trauma and Orthopaedics, Royal Bournemouth and Christchurch NHS Trust

I am Trauma and Orthopaedic Consultant providing trauma services to Poole General Hospital and elective services at the Royal Bournemouth Hospital. My areas of specialist interest include all aspects of trauma surgery, knee arthroplasty (conservative, primary and revision) arthroscopy, cruciate ligament reconstruction and sports surgery. My medicolegal interests include tibial plateau fractures, amputation and necrotizing fasciitis. I retain an active involvement in teaching and research and continue to publish research findings in the international medical literature and present worldwide.

Medico-legal experience

I produce approximately 100 medico-legal reports per year for both personal injury and clinical negligence. I have been doing so since 2013 and have produced about 900 reports to date. Reports are approximately 90% claimant, 10% defendant. I am a registered Expert with the Association of Personal Injury Lawyers (APIL) and a member of the Faculty of Expert Witnesses. I have attended Coroners Courts, GMC hearings and Criminal Court as an expert witness and material witness. I am very familiar with joint discussions and the preparation of joint statements. I regularly complete specific training with regards to medico-legal reporting and regularly engage in peer review of my work to ensure high standards are maintained. I enjoy high levels of repeat instruction and long-term professional relationships with a number of high-level firms. I have a particular reputation for cases involving cycling injuries and knee injuries.

Research

I have over 40 published papers. I have engaged in a variety of research ranging from basic science work, cost effectiveness studies, clinical outcome studies, to patient focused projects. I have published widely from letters to prospective studies. My publications have appeared in leading journals including BMJ, JBJS, Knee, BJHM and J Hosp Infect. Two of my publications have been independently nominated and accepted into the Faculty of 1000 (the 1000 most significant publications in medicine). I am a peer reviewer for a number of journals and an Editor for the World Journal of Orthopaedics and have been an invited expert for the NEJM.

I have presented my research findings widely to a variety of audiences world wide. I am confident providing authoritative information and fielding questions. My presentations have won numerous prizes.
